-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-84 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 134-200 of copending Application No. 10/784830. Although the conflicting claims are not identical, they are not patentably distinct from each other because it would have been obvious to rearrange or omit parts of the copending applications since such involves only routine skill in the art. Omission of an element and its function in a combination where the remaining elements perform the same functions as before involves only routine skill in the art.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

3. Claims 1-84 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 134-196 of copending Application No. 10/795,216. Although the conflicting claims are not identical, they are not patentably distinct from each other because it would have been obvious to rearrange or omit parts of the copending applications since such involves only routine skill in the art. Omission of an element and its function in a combination where the remaining elements perform the same functions as before involves only routine skill in the art.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

4. Claims 1-84 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 150-256 of copending Application No. 10/456576. Although the conflicting claims are not identical, they are not patentably distinct from each other because it would have been obvious to rearrange or omit parts of the copending applications since such involves only routine skill in the art. Omission of an element and its function in a combination where the remaining elements perform the same functions as before involves only routine skill in the art.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Art Unit: 1773

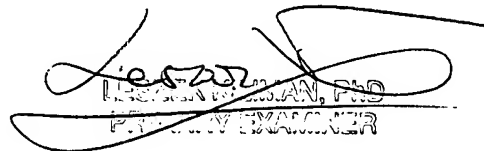

The amendments and remarks and Terminal Disclaimer submitted by applicants have been fully considered. The claims, however, remain unpatentable in view of the new grounds of rejections.
